

# Year 3 Plants Revision Mat

Fill in the names of the parts of a plant.

Every part of the plant has a specific function. Can you match them?

- roots                      collect the sunlight to convert carbon dioxide and water into food
- stem                        anchor the plant into the ground and absorb water and nutrients from the soil
- leaves                      transports water and nutrients upwards

Fill in missing words using words from the box:

For a plant to \_\_\_\_\_ well, it needs the right \_\_\_\_\_ of water, \_\_\_\_\_, nutrients from the \_\_\_\_\_, air and room to grow

light    grow    soil    amount

Tick the right form of seed dispersal for each plant:

	<input type="checkbox"/> wind dispersal <input type="checkbox"/> animal dispersal <input type="checkbox"/> dropping
	<input type="checkbox"/> wind dispersal <input type="checkbox"/> animal dispersal <input type="checkbox"/> dropping

The flower has two functions – what are they?
